

## Preparation Instructions: Fleas

Our goal is to eliminate fleas from your home as quickly and effectively as possible. In order to do this, we have created the preparation instructions below. By following these steps, you will help your technician to complete your flea treatment fully, so please read through the preparation instructions below and follow them to the very best of your ability. By following these instructions, you can help make your service a success.

- Please remove all personal and small items from carpeted areas.
- Please remove all items from underneath furniture, including those under beds, couches, tables, and on closet floors.
- Cover fish tanks, and turn off or remove the tank's filter.
- Please thoroughly vacuum carpeted areas and along all baseboards the day of or day before your treatment appointment. Dispose of vacuum contents in a sealed garage bag outside your home.
- Birds and reptiles should be removed from your home during treatment and should not be allowed to return for at least 4 hours after treatment concludes. For the safety of birds and reptiles, please do not allow them to come into contact with any surfaces that may have been treated for at least 1 year.
- All people and other pets must vacate the home during treatment and should not return for at least 4 hours following treatment.
- Please ensure all doors inside the home are unlocked to allow your technician to treat as fully as possible.
- Please thoroughly vacuum carpeted areas and along all baseboards daily for 10 days following your treatment appointment. This step is extremely important. The vibration of the vacuum causes eggs to hatch, so that they will come into contact with treated surfaces, die, and eliminate the infestation. Always immediately dispose of vacuum contents in a sealed garage bag outside your home.
- Please consult with your vet for an appropriate preventative flea treatment for pets.

If you have any questions or concerns please regarding preparation please contact Halt Pest Control at (503) 524-8548.

*Thank you for choosing Halt Pest Control to protect your property!*
